

15th-18th April 2012

15th-18th April 2012

Join us for 3 days of peaceful, poetic & creative protest at Menwith Hill, the largest US spy station outside the United States and a key part of the Military-Industrial complex in Yorkshire—a US enclave with a dark role in global intelligence gathering and warfare.

**Menwith Hill is watching...**

The base has the capability to intercept global communications including internet, email and telephone (none of this surveillance is accountable to UK parliament).

**Menwith Hill is watching...**

The base has the capability to intercept global communications including internet, email and telephone (none of this surveillance is accountable to UK parliament).

**Menwith Hill is warmongering**

Menwith Hill plays an active role in US wars, providing real-time military information for covert operations such as assassination squads and drone strikes that kill innocent civilians. They're so proud of their warmongering at Menwith that they even have an award for their role in the Iraq war.

**And YOU pay for it!**

The base is part funded by UK taxpayers. One FOI request revealed that over £7m had been spent on site infrastructure over the last few years. Yet both the base itself and its military personnel receive tax exemptions despite having access to local public services. Investment squandered on the base could be used to support education or the NHS instead.
